### BIO

Msc. Inesa Delimeta graduated from the Faculty of Dental Medicine, University of Medicine, Tirana in 2018. Her professional journey started at Dental Leader Corsi, a dental academy, where she was assigned as the main responsible for the academic department of the company. In this capacity, she successfully coordinated the overall workflow for organizing postgraduate courses designed for Albanian dentists in collaboration with Italian universities and European partners. She played an integral part in shaping the academic curriculum and ensuring the effective organization of practical course components. These training programs covered a wide range of dental specialties including: orthodontics, implantology, and aesthetic dentistry. Furthermore, she has served as a dental assistant alongside esteemed professors from renowned Italian universities, an experience that significantly contributed to her continued professional growth. In addition to numerous courses in Albania, she expanded her education by participating in training programs organized by ISO-Istituto Studi Odontoiatrici, Leone in Florence in 2019 and 2022. In the subsequent phase of her career, Msc. Inesa Delimeta has worked as a general dentist in a dental clinic in Tirana for a period of two years where she provided specialized dental care for patients, effectively resolving their concerns and meeting their expectations. She promoted a healthy, safe, and supportive environment that benefited both patients and clinical staff members. Additionally, she has recently accomplished a Master in Public Health at Cardiff University after being awarded the prestigious Chevening Scholarship sponsored by the Foreign, Commonwealth, and Development Office (FCDO). In addition to her academic and professional pursuits, she has been actively involved in volunteering, dedicating her time and expertise to organizations such as the British Heart Foundation and Cancer Research UK.
